

More Precision

scanCONTROL // 2D/3D Laser profile sensors

Powerful 2D/3D laser scanners scanCONTROL 30x2

Precise profile measurements for industrial measurement tasks

Resolution (x-axis) 1,024 points

Profile frequency up to 10,000 Hz

For small and large measuring ranges

Also available with patented Blue Laser Technology

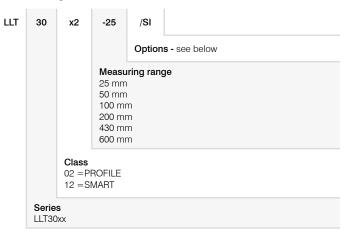

Compatible with **COGNEX**® VisionPro

Precise 2D/3D profile measurements

The new LLT30x2 laser profile scanners provide calibrated profile data with up to 7.9 million points per second. They allow profile frequencies up to 10 kHz and resolutions up to 1,024 points. Thanks to their high accuracy and versatility, the scanners are particularly suitable for static and dynamic applications as well as robotic applications. They measure and evaluate, e. g., angles, steps, gaps, distances, and circles.

Article designation

Available as PROFILE and SMART versions

The scanCONTROL 30x2 series is available as PROFILE and SMART versions. The PROFILE scanners provide calibrated profile data that can be further processed on a PC with software evaluation provided by the customer. The 3DInspect software allows for the scanCONTROL sensors to be used also for 3D evaluations.

SMART scanners operate autonomously and provide selected measurement values. The scanCONTROL 30x2 series supports all SMART functions and programs that are set in the scanCONTROL Configuration Tools software and directly stored in the internal controller.

Laser options*

/SIHardware switch-off of the laser line/3RIncreased laser power (class 3R)
e.g., for dark surfaces/BLBlue laser line (405 nm) for (semi-) transparent,
red-hot glowing and organic materials
(Measuring ranges 25 - 100 mm)

Cable outlet options*

/RT	Cable outlet on the rear side ("Rear Tail") for space-saving installation, cable length 0.3 m. Sockets at cable end (Measuring ranges 25 - 200 mm)
/PT	Cable directly out of the sensor ("Pigtail") Available lengths: 0.3 / 0.6 / 1.00 m

*Options can be combined

Accessories from page 42

The easy way of machine integration

The design of the LLT30x2 series is compact and lightweight. The controller is integrated in the sensor itself, which simplifies mechanical integration. The measurement data can be output directly.

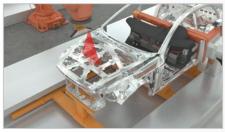

Large measurement area up to 600 x 600 mm

The scanCONTROL 30x2 laser scanners are now also available with a large measuring field up to 600×600 mm. This allows large measuring objects to be detected with high accuracy.

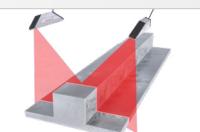

Application examples

Assembly monitoring of car body shell construction

Detection of the road surface profile

Geometry inspection in metals processing
